INDEX OF SUBJECTS

A	Central nervous pathways:
Abalone:	Aspects of the organization of, in Aplysia
See Haliotis rufescens	depilans 45
Abdominal nerve cord:	Central nervous system:
Unit activity in the, of a dragonfly nymph 31	The distribution and exchange of some ions
- Some effects of the ionic composition of the	and molecules in the, of Periplaneta ameri-
extracellular fluid on the electrical activity of	cana L. 193
the cockroach 631	Chitin synthesis:
Actinophrys:	Studies on, in the desert locust 129
Desquamation in, induction and inhibition	Cicada song:
Ampullae of Lorenzini:	Cilium:
The response of the, of elasmobranchs to	Force exerted by a single, of Mytilus edulis.
electrical stimulation 119	II. Free motion 307
Aphysia depilans:	Co-ordinated motor units:
Aspects of the organization of central nervous	Patterned activity of, studied in flying locusts
pathways in 45	643
Aquatic insects:	Corpus cardiscum:
The composition of haemolymph in 325	The mode of action of the, on the hind gut in
	Periplaneta americana 319
В	Crab-eating frog:
Balanus balanus:	See Rana cancrivora
The composition of the seminal plasma of	
345	
Bifunctional muscles:	_ D
In the thorax of grasshoppers 669	Dances:
Blowflies:	Of honeybees, at small zenith distances of
The imaginal ecdysis of. The control of	the sun 271
cuticular hardening and darkening 395	Desert locust:
— The imaginal ecdysis of. Detection of the	Studies on chitin synthesis in the 129 Desquamation:
blood-borne darkening factor and determi-	In Actinophrys: induction and inhibition
nation of some of its properties 413	
— The imaginal ecdysis of. Observations on the	Developmental variability:
hydrostatic mechanisms involved in digging and expansion 431	Maternal age and 251
and expansion 431 — The imaginal ecdysis of. Evidence for a	Diadema setosum (Leske):
change in the mechanical properties of the	The effect of light on the shadow reaction of
cuticle at expansion 449	the sea urchin 589
- See also Calliphora erythrocephala (Meig.);	Dogfish:
Phorina regina (Meig.)	See Squalus acanthias L.
Bufo viridis L.:	Dogfish gill:
Osmotic regulation in the green toad 261	Intrinsic vasomotion in the 503
	Dragonflies (Odonata):
C	Spiracle control in adult 513
_	Dragonfly nymph:
Caddis larvae (Trichoptera):	Unit activity in the abdominal nerve cord of a
Studies on salt and water balance in. III.	31
Drinking and excretion 141	_
Calliphora erythrocephala (Meig.):	E
The relationship between nutrition, hor-	Earthworm:
mones and reproduction in the blowfly.	See Lumbricus terrestris L.
III. The corpus allatum in relation to nutri-	The effect of recepting when the communic of
tion, the ovaries, innervation and the corpus	The effect of resorbing, upon the sex ratio of
cardiacum 293	the offspring in Nasonia vitripennis (Hymen-
Carcinus maenas (L.): Peripheral reflex inhibition in the claw of the	optera, Pteromalidae) 161 Elasmobranchs:
crab 71	The response of the ampullae of Lorenzini
- Proprioceptive reflexes in the legs of 89	of, to electrical stimulation 119
p-1000 pm - 1 - 10 mo 10 po of 0 y	,

-	•
Electrical activity:	I
Some effects of the ionic composition of the	Imaginal ecdysis:
extracellular fluid on the, of the cockroach	The, of blowflies. The control of cuticular
abdominal nerve cord 631	hardening and darkening 395
Electrical stimulation:	— The, of blowflies. Detection of the blood-
The response of the ampullae of Lorenzini of elasmobranchs to	borne darkening factor and determination of some of its properties 413
elasmobranchs to 119 Excretory processes:	some of its properties 413 — The, of blowflies. Observations on the hydro-
Some, in the abalone, Haliotis rufescens 179	static mechanisms involved in digging and
Extracellular fluid:	expansion 431
Some effects of the ionic composition of the,	- The, of blowflies. Evidence for a change in the
on the electrical activity of the cockroach	mechanical properties of the cuticle at
abdominal nerve cord 631	expansion 449
	Innervation:
	Of locomotor movements by the lumbosacral
F	cord in birds and animals 239 Intraocular discrimination:
Fish:	Evidence for the, of vertically and hori-
Temperature acclimatization and the nervous	zontally polarized light by Octopus 21
system in 617	Ionic composition:
Flight:	Some effects of the, of the extracellular fluid
Preparation for, by hawk-moths 579 Fructolysis:	on the electrical activity of the cockroach
Anaerobic heat production and, of bull	abdominal nerve cord 631
spermatozoa at different temperatures 387	Ions:
•	The distribution and exchange of some, and
G	molecules in the central nervous system of Periplaneta americana L. 193
Giant fibre reflex:	Periplaneta americana L. 193
The, of the earthworm, Lumbricus terrestris L.	ĸ
I. The rapid response 219	Kidney function:
— The, of the earthworm, Lumbricus terrestris L.	In the crab-eating frog (Rana cancrivora)
II. Fatigue	167
Goldfish:	L
The reaction of a blinded, to rotation in a	Learning:
centrifuge 491 Grasshoppers:	Olfactory and visual, in the red-eared terra-
Bifunctional muscles in the thorax of 669	pin, Pseudemys scripta elegans (Wied.) 567
Green toad:	Light:
See Bufo viridis L. 261	The effect of, on the shadow reaction of the
	sea urchin, Diadema setosum (Leske) 589
	Locomotor movements:
H	Innervation of, by the lumbosacral cord in birds and animals
Haemolymph:	birds and animals 239 Locusts:
The composition of, in aquatic insects 325	Patterned activity of co-ordinated motor
Haliotis rufescens:	units, studied in flying 643
Some excretory processes in the abalone	Lumbosacral cord:
Hawk-moths:	Innervation of locomotor movements by the,
Preparation for flight by 579	in birds and animals 239
Heat production:	Lumbricus terrestris L.:
Anaerobic, and fructolysis of bull spermatozoa	The giant fibre reflex of the earthworm. I. The rapid response 219
at different temperatures 387	1. The rapid response 219 — The giant fibre reflex of the earthworm.
Hind gut:	II. Fatigue 229
The mode of action of the corpus cardiacum	,
on the, in Periplaneta americana 319	M Material age:
Honeybees: The dances of, at small zenith distances of the	Maternal age: And developmental variability 251
sun 271	And developmental variability 251 Metabolism:
Hormones:	The oxygen uptake and of Balanus balanus
The relationship between nutrition, and	spermatozoa 353
reproduction in the blowfly Calliphora	Molecules:
erythrocephala (Meig.). III. The corpus	The distribution and exchange of some ions
allatum in relation to nutrition, the ovaries,	and, in the central nervous system of Peri-
innervation and the corpus cardiacum 293	planeta americana L. 193

Myo-neural physiology: Observations on the, of the polyclad Planocera gilchristi 459 Mytilus edulis:	Pseudemys scripta elegans (Wied.): Olfactory and visual learning in the red- eared terrapin 567
Force exerted by a single cilium of. II. Free	R
motion 307	Rana cancrivora:
N	Kidney function in the crab-eating frog
	Red cored terroring
Nasonia vitripennis (Hymenoptera, Ptero- malidae): The effect of resorbing eggs upon the sex	Red-eared terrapin: See Pseudemys scripta elegans (Wied.) Reflex inhibition:
ratio of the offspring in 161	Peripheral, in the claw of the crab, Carcinus
Nervous system:	maenas (L.) 71
Temperature acclimatization and the, in fish	Reproduction:
Nutrition:	The relationship between nutrition, hormones and, in the blowfly Calliphora erythrocephala (Meig.). III. The corpus allatum in relation
The relationship between, hormones and reproduction in the blowfly Calliphora	to nutrition, the ovaries, innervation and the
erythrocephala (Meig.). III. The corpus	corpus cardiacum 293
allatum in relation to nutrition, the ovaries,	Reptiles:
innervation and the corpus cardiacum 293	On the regulation of respiration in. II. The
-	effect of hypoxia with and without moderate
0	hypercapnia on the respiration and meta- bolism of lizards
Octopus:	Respiration:
Simultaneous shape discrimination in, after	On the regulation of, in reptiles. II. The
removal of the vertical lobe 557 Olfactory stimuli:	effect of hypoxia with and without moderate
And oviposition in the blowfly, <i>Phormia</i>	hypercapnia on the respiration and meta-
regina (Meig.) 603	bolism of lizards 107
Osmotic regulation:	
In the green toad (Bufo viridis) 261	S
Oviposition:	
Olfostory etimuli and in the blowfly	Salt and water balance:
Olfactory stimuli and, in the blowfly, <i>Phormia regina</i> (Meig.) 603 Oxygen uptake:	Studies on, in caddis larvae (Trichoptera). III. Drinking and excretion 141
	Studies on, in caddis larvae (Trichoptera). III. Drinking and excretion 141 Sea anemones:
Phormia regina (Meig.) 603 Oxygen uptake:	Studies on, in caddis larvae (Trichoptera). III. Drinking and excretion 141 Sea anemones: Visco-elastic properties of the body-wall of
Phormia regina (Meig.) 603 Oxygen uptake: The, and metabolism of Balanus balanus spermatozoa 353	Studies on, in caddis larvae (Trichoptera). III. Drinking and excretion 141 Sea anemones: Visco-elastic properties of the body-wall of 373
Phormia regina (Meig.) 603 Oxygen uptake: The, and metabolism of Balanus balanus	Studies on, in caddis larvae (Trichoptera). III. Drinking and excretion 141 Sea anemones: Visco-elastic properties of the body-wall of 373 Sea urchin:
Phormia regina (Meig.) 603 Oxygen uptake: The, and metabolism of Balanus balanus spermatozoa 353 P	Studies on, in caddis larvae (Trichoptera). III. Drinking and excretion 141 Sea anemones: Visco-elastic properties of the body-wall of 373 Sea urchin: See Diadema setosum (Leske) Seminal plasma:
Phormia regina (Meig.) 603 Oxygen uptake: The, and metabolism of Balanus balanus spermatozoa 353 P Patterned activity: Of co-ordinated motor units, studied in flying locusts 643	Studies on, in caddis larvae (Trichoptera). III. Drinking and excretion 141 Sea anemones: Visco-elastic properties of the body-wall of 373 Sea urchin: See Diadema setosum (Leske)
Phormia regina (Meig.) 603 Oxygen uptake: The, and metabolism of Balanus balanus spermatozoa 353 P Patterned activity: Of co-ordinated motor units, studied in flying locusts 643 Periplaneta americana L.:	Studies on, in caddis larvae (Trichoptera). III. Drinking and excretion 141 Sea anemones: Visco-elastic properties of the body-wall of 373 Sea urchin: See Diadema setosum (Leske) Seminal plasma: The composition of the, of Balanus balanus 345
Phormia regina (Meig.) 603 Oxygen uptake: The, and metabolism of Balanus balanus spermatozoa 353 P Patterned activity: Of co-ordinated motor units, studied in flying locusts 643 Periplaneta americana L.: The distribution and exchange of some ions	Studies on, in caddis larvae (Trichoptera). III. Drinking and excretion 141 Sea anemones: Visco-elastic properties of the body-wall of 373 Sea urchin: See Diadema setosum (Leske) Seminal plasma: The composition of the, of Balanus balanus 345 Sex ratio:
Phormia regina (Meig.) 603 Oxygen uptake: The, and metabolism of Balanus balanus spermatozoa 353 P Patterned activity: Of co-ordinated motor units, studied in flying locusts 643 Periplaneta americana L.: The distribution and exchange of some ions and molecules in the central nervous system	Studies on, in caddis larvae (Trichoptera). III. Drinking and excretion 141 Sea anemones: Visco-elastic properties of the body-wall of 373 Sea urchin: See Diadema setosum (Leske) Seminal plasma: The composition of the, of Balanus balanus 345 Sex ratio: The effect of resorbing eggs upon the, of the
Phormia regina (Meig.) 603 Oxygen uptake: The, and metabolism of Balanus balanus spermatozoa 353 P Patterned activity: Of co-ordinated motor units, studied in flying locusts 643 Periplaneta americana L.: The distribution and exchange of some ions and molecules in the central nervous system	Studies on, in caddis larvae (Trichoptera). III. Drinking and excretion 141 Sea anemones: Visco-elastic properties of the body-wall of 373 Sea urchin: See Diadema setosum (Leske) Seminal plasma: The composition of the, of Balanus balanus 345 Sex ratio:
Phormia regina (Meig.) 603 Oxygen uptake: The, and metabolism of Balanus balanus spermatozoa 353 P Patterned activity: Of co-ordinated motor units, studied in flying locusts 643 Periplaneta americana L.: The distribution and exchange of some ions and molecules in the central nervous system of 193 The mode of action of the corpus cardiacum on the hind gut in 319	Studies on, in caddis larvae (Trichoptera). III. Drinking and excretion 141 Sea anemones: Visco-elastic properties of the body-wall of 373 Sea urchin: See Diadema setosum (Leske) Seminal plasma: The composition of the, of Balanus balanus 345 Sex ratio: The effect of resorbing eggs upon the, of the offspring in Nasonia vitripennis (Hymenoptera, Pteromalidae) Shadow reaction:
Phormia regina (Meig.) 603 Oxygen uptake: The, and metabolism of Balanus balanus spermatozoa 353 P Patterned activity: Of co-ordinated motor units, studied in flying locusts 643 Periplaneta americana L.: The distribution and exchange of some ions and molecules in the central nervous system of 193 The mode of action of the corpus cardiacum on the hind gut in 319 Pharyngeal proprioceptors:	Studies on, in caddis larvae (Trichoptera). III. Drinking and excretion 141 Sea anemones: Visco-elastic properties of the body-wall of 373 Sea urchin: See Diadema setosum (Leske) Seminal plasma: The composition of the, of Balanus balanus 345 Sex ratio: The effect of resorbing eggs upon the, of the offspring in Nasonia vitripennis (Hymenoptera, Pteromalidae) Shadow reaction: The effect of light on the, of the sea urchin,
Phormia regina (Meig.) 603 Oxygen uptake: The, and metabolism of Balanus balanus spermatozoa 353 P Patterned activity: Of co-ordinated motor units, studied in flying locusts 643 Periplaneta americana L.: The distribution and exchange of some ions and molecules in the central nervous system of 193 The mode of action of the corpus cardiacum on the hind gut in 319 Pharyngeal proprioceptors: In the dogfish Squalus acanthus L. 000	Studies on, in caddis larvae (Trichoptera). III. Drinking and excretion 141 Sea anemones: Visco-elastic properties of the body-wall of 373 Sea urchin: See Diadema setosum (Leske) Seminal plasma: The composition of the, of Balanus balanus 345 Sex ratio: The effect of resorbing eggs upon the, of the offspring in Nasonia vitripennis (Hymenoptera, Pteromalidae) 161 Shadow reaction: The effect of light on the, of the sea urchin, Diadema setosum (Leske) 589
Phormia regina (Meig.) 603 Oxygen uptake: The, and metabolism of Balanus balanus spermatozoa 353 P Patterned activity: Of co-ordinated motor units, studied in flying locusts 643 Periplaneta americana L.: The distribution and exchange of some ions and molecules in the central nervous system of 193 The mode of action of the corpus cardiacum on the hind gut in 319 Pharyngeal proprioceptors: In the dogfish Squalus acanthus L. 000 Phormia regina (Meig.):	Studies on, in caddis larvae (Trichoptera). III. Drinking and excretion 141 Sea anemones: Visco-elastic properties of the body-wall of 373 Sea urchin: See Diadema setosum (Leske) Seminal plasma: The composition of the, of Balanus balanus 345 Sex ratio: The effect of resorbing eggs upon the, of the offspring in Nasonia vitripennis (Hymenoptera, Pteromalidae) Shadow reaction: The effect of light on the, of the sea urchin, Diadema setosum (Leske) Shape discrimination:
Phormia regina (Meig.) 603 Oxygen uptake: The, and metabolism of Balanus balanus spermatozoa 353 P Patterned activity: Of co-ordinated motor units, studied in flying locusts 643 Periplaneta americana L.: The distribution and exchange of some ions and molecules in the central nervous system of 193 — The mode of action of the corpus cardiacum on the hind gut in 319 Pharyngeal proprioceptors: In the dogfish Squalus acanthus L. 000 Phormia regina (Meig.): Olfactory stimuli and oviposition in the blow-	Studies on, in caddis larvae (Trichoptera). III. Drinking and excretion 141 Sea anemones: Visco-elastic properties of the body-wall of 373 Sea urchin: See Diadema setosum (Leske) Seminal plasma: The composition of the, of Balanus balanus 345 Sex ratio: The effect of resorbing eggs upon the, of the offspring in Nasonia vitripennis (Hymenoptera, Pteromalidae) Shadow reaction: The effect of light on the, of the sea urchin, Diadema setosum (Leske) Shape discrimination: Simultaneous, in Octopus after removal of the
Phormia regina (Meig.) 603 Oxygen uptake: The, and metabolism of Balanus balanus spermatozoa 353 P Patterned activity: Of co-ordinated motor units, studied in flying locusts 643 Periplaneta americana L.: The distribution and exchange of some ions and molecules in the central nervous system of 193 The mode of action of the corpus cardiacum on the hind gut in 319 Pharyngeal proprioceptors: In the dogfish Squalus acanthus L. 000 Phormia regina (Meig.):	Studies on, in caddis larvae (Trichoptera). III. Drinking and excretion 141 Sea anemones: Visco-elastic properties of the body-wall of 373 Sea urchin: See Diadema setosum (Leske) Seminal plasma: The composition of the, of Balanus balanus 345 Sex ratio: The effect of resorbing eggs upon the, of the offspring in Nasonia vitripennis (Hymenoptera, Pteromalidae) Shadow reaction: The effect of light on the, of the sea urchin, Diadema setosum (Leske) Shape discrimination: Simultaneous, in Octopus after removal of the
Phormia regina (Meig.) 603 Oxygen uptake: The, and metabolism of Balanus balanus spermatozoa 353 P Patterned activity: Of co-ordinated motor units, studied in flying locusts 643 Periplaneta americana L.: The distribution and exchange of some ions and molecules in the central nervous system of 193 The mode of action of the corpus cardiacum on the hind gut in 319 Pharyngeal proprioceptors: In the dogfish Squalus acanthus L. 000 Phormia regina (Meig.): Olfactory stimuli and oviposition in the blowfly 603 Planocera gilchristi: Observations on the myo-neural physiology	Studies on, in caddis larvae (Trichoptera). III. Drinking and excretion 141 Sea anemones: Visco-elastic properties of the body-wall of 373 Sea urchin: See Diadema setosum (Leske) Seminal plasma: The composition of the, of Balanus balanus 345 Sex ratio: The effect of resorbing eggs upon the, of the offspring in Nasonia vitripennis (Hymenoptera, Pteromalidae) The effect of light on the, of the sea urchin, Diadema setosum (Leske) Shape discrimination: Simultaneous, in Octopus after removal of the vertical lobe 557 Speed: Training, and stamina in trout 537
Phormia regina (Meig.) 603 Oxygen uptake: The, and metabolism of Balanus balanus spermatozoa 353 P Patterned activity: Of co-ordinated motor units, studied in flying locusts 643 Periplaneta americana L.: The distribution and exchange of some ions and molecules in the central nervous system of 193 The mode of action of the corpus cardiacum on the hind gut in 319 Pharyngeal proprioceptors: In the dogfish Squalus acanthus L. 000 Phormia regina (Meig.): Olfactory stimuli and oviposition in the blowfly 603 Planocera gilchristi: Observations on the myo-neural physiology of the polyclad 459	Studies on, in caddis larvae (Trichoptera). III. Drinking and excretion 141 Sea anemones: Visco-elastic properties of the body-wall of 373 Sea urchin: See Diadema setosum (Leske) Seminal plasma: The composition of the, of Balanus balanus 345 Sex ratio: The effect of resorbing eggs upon the, of the offspring in Nasonia vitripennis (Hymenoptera, Pteromalidae) The effect of light on the, of the sea urchin, Diadema setosum (Leske) Shape discrimination: Simultaneous, in Octopus after removal of the vertical lobe 557 Speed: Training, and stamina in trout 537 Spermatozoa:
Phormia regina (Meig.) 603 Oxygen uptake: The, and metabolism of Balanus balanus spermatozoa 353 P Patterned activity: Of co-ordinated motor units, studied in flying locusts 643 Periplaneta americana L.: The distribution and exchange of some ions and molecules in the central nervous system of 193 The mode of action of the corpus cardiacum on the hind gut in 319 Pharyngeal proprioceptors: In the dogfish Squalus acanthus L. 000 Phormia regina (Meig.): Olfactory stimuli and oviposition in the blowfly 603 Planocera gilchristi: Observations on the myo-neural physiology of the polyclad 459 Polarized light:	Studies on, in caddis larvae (Trichoptera). III. Drinking and excretion 141 Sea anemones: Visco-elastic properties of the body-wall of 373 Sea urchin: See Diadema setosum (Leske) Seminal plasma: The composition of the, of Balanus balanus 345 Sex ratio: The effect of resorbing eggs upon the, of the offspring in Nasonia vitripennis (Hymenoptera, Pteromalidae) The effect of light on the, of the sea urchin, Diadema setosum (Leske) Shape discrimination: Simultaneous, in Octopus after removal of the vertical lobe 557 Speed: Training, and stamina in trout 537 Spermatozoa: The oxygen uptake and metabolism of
Phormia regina (Meig.) 603 Oxygen uptake: The, and metabolism of Balanus balanus spermatozoa 353 P Patterned activity: Of co-ordinated motor units, studied in flying locusts 643 Periplaneta americana L.: The distribution and exchange of some ions and molecules in the central nervous system of 193 — The mode of action of the corpus cardiacum on the hind gut in 319 Pharyngeal proprioceptors: In the dogfish Squalus acanthus L. 000 Phormia regina (Meig.): Olfactory stimuli and oviposition in the blowfly 603 Planocera gilchristi: Observations on the myo-neural physiology of the polyclad 459 Polarized light: Evidence for the intraocular discrimination	Studies on, in caddis larvae (Trichoptera). III. Drinking and excretion 141 Sea anemones: Visco-elastic properties of the body-wall of 373 Sea urchin: See Diadema setosum (Leske) Seminal plasma: The composition of the, of Balanus balanus 345 Sex ratio: The effect of resorbing eggs upon the, of the offspring in Nasonia vitripennis (Hymenoptera, Pteromalidae) The effect of light on the, of the sea urchin, Diadema setosum (Leske) Shape discrimination: Simultaneous, in Octopus after removal of the vertical lobe 557 Speed: Training, and stamina in trout 537 Spermatozoa:
Phormia regina (Meig.) 603 Oxygen uptake: The, and metabolism of Balanus balanus spermatozoa 353 P Patterned activity: Of co-ordinated motor units, studied in flying locusts 643 Periplaneta americana L.: The distribution and exchange of some ions and molecules in the central nervous system of 193 The mode of action of the corpus cardiacum on the hind gut in 319 Pharyngeal proprioceptors: In the dogfish Squalus acanthus L. 000 Phormia regina (Meig.): Olfactory stimuli and oviposition in the blowfly 603 Planocera gilchristi: Observations on the myo-neural physiology of the polyclad 459 Polarized light:	Studies on, in caddis larvae (Trichoptera). III. Drinking and excretion 141 Sea anemones: Visco-elastic properties of the body-wall of 373 Sea urchin: See Diadema setosum (Leske) Seminal plasma: The composition of the, of Balanus balanus 345 Sex ratio: The effect of resorbing eggs upon the, of the offspring in Nasonia vitripennis (Hymenoptera, Pteromalidae) The effect of light on the, of the sea urchin, Diadema setosum (Leske) Shape discrimination: Simultaneous, in Octopus after removal of the vertical lobe 557 Speed: Training, and stamina in trout 537 Spermatozoa: The oxygen uptake and metabolism of Balanus balanus 353
Phormia regina (Meig.) 603 Oxygen uptake: The, and metabolism of Balanus balanus spermatozoa 353 P Patterned activity: Of co-ordinated motor units, studied in flying locusts 643 Periplaneta americana L.: The distribution and exchange of some ions and molecules in the central nervous system of 193 The mode of action of the corpus cardiacum on the hind gut in 319 Pharyngeal proprioceptors: In the dogfish Squalus acanthus L. 000 Phormia regina (Meig.): Olfactory stimuli and oviposition in the blowfly 603 Planocera gilchristi: Observations on the myo-neural physiology of the polyclad 459 Polarized light: Evidence for the intraocular discrimination of vertically and horizontally, by Octopus	Studies on, in caddis larvae (Trichoptera). III. Drinking and excretion 141 Sea anemones: Visco-elastic properties of the body-wall of 373 Sea urchin: See Diadema setosum (Leske) Seminal plasma: The composition of the, of Balanus balanus 345 Sex ratio: The effect of resorbing eggs upon the, of the offspring in Nasonia vitripennis (Hymenoptera, Pteromalidae) The effect of light on the, of the sea urchin, Diadema setosum (Leske) Shape discrimination: Simultaneous, in Octopus after removal of the vertical lobe 557 Speed: Training, and stamina in trout 537 Spermatozoa: The oxygen uptake and metabolism of Balanus balanus 9353 Anaerobic heat production and fructolysis of bull, at different temperatures 987
Phormia regina (Meig.) 603 Oxygen uptake: The, and metabolism of Balanus balanus spermatozoa 353 P Patterned activity: Of co-ordinated motor units, studied in flying locusts 643 Periplaneta americana L.: The distribution and exchange of some ions and molecules in the central nervous system of 193 — The mode of action of the corpus cardiacum on the hind gut in 319 Pharyngeal proprioceptors: In the dogfish Squalus acanthus L. 000 Phormia regina (Meig.): Olfactory stimuli and oviposition in the blowfly 603 Planocera gilchristi: Observations on the myo-neural physiology of the polyclad 459 Polarized light: Evidence for the intraocular discrimination of vertically and horizontally, by Octopus Polyclad: See Planocera gilchristi	Studies on, in caddis larvae (Trichoptera). III. Drinking and excretion 141 Sea anemones: Visco-elastic properties of the body-wall of 373 Sea urchin: See Diadema setosum (Leske) Seminal plasma: The composition of the, of Balanus balanus 345 Sex ratio: The effect of resorbing eggs upon the, of the offspring in Nasonia vitripennis (Hymenoptera, Pteromalidae) Shadow reaction: The effect of light on the, of the sea urchin, Diadema setosum (Leske) Shape discrimination: Simultaneous, in Octopus after removal of the vertical lobe 557 Speed: Training, and stamina in trout 537 Spermatozoa: The oxygen uptake and metabolism of Balanus balanus Anaerobic heat production and fructolysis of bull, at different temperatures 387 Spiracle control: In adult dragonflies (Odonata) 513
Phormia regina (Meig.) 603 Oxygen uptake: The, and metabolism of Balanus balanus spermatozoa 353 P Patterned activity: Of co-ordinated motor units, studied in flying locusts 643 Periplaneta americana L.: The distribution and exchange of some ions and molecules in the central nervous system of 193 The mode of action of the corpus cardiacum on the hind gut in 319 Pharyngeal proprioceptors: In the dogfish Squalus acanthus L. 000 Phormia regina (Meig.): Olfactory stimuli and oviposition in the blowfly 603 Planocera gilchristi: Observations on the myo-neural physiology of the polyclad 459 Polarized light: Evidence for the intraocular discrimination of vertically and horizontally, by Octopus	Studies on, in caddis larvae (Trichoptera). III. Drinking and excretion 141 Sea anemones: Visco-elastic properties of the body-wall of 373 Sea urchin: See Diadema setosum (Leske) Seminal plasma: The composition of the, of Balanus balanus 345 Sex ratio: The effect of resorbing eggs upon the, of the offspring in Nasonia vitripennis (Hymenoptera, Pteromalidae) Shadow reaction: The effect of light on the, of the sea urchin, Diadema setosum (Leske) Shape discrimination: Simultaneous, in Octopus after removal of the vertical lobe Speed: Training, and stamina in trout 537 Spermatozoa: The oxygen uptake and metabolism of Balanus balanus 353 — Anaerobic heat production and fructolysis of bull, at different temperatures 387 Spiracle control:
